Code No: D-2372/N/AICTE

FACULTY OF ENGINEERING

BE (CSE) III - Semester (AICTE) (Main) Examination, March / April 2022

Subject: Discrete Mathematics

Time: 3 Hours

Max. Marks: 70

'AICT

022

- Note: (i) First question is compulsory and answer any four questions from the remaining six questions. Each Questions carries 14 Marks.
 - (ii) Answer to each question must be written at one place only and in the same order as they occur in the question paper.
 - (iii) Missing data, if any, may be suitably assumed.
- (a) Construct the truth table for $(p \to q) \leftrightarrow (\sim p \cup q)$
 - (b) What is the Cartesian product $A \times B \times C$, where $A = \{0, 1\}, B = \{1, 2\}$, and $C = \{0, 1, 2\}$?
 - (c) Let $f: R \to R$ and $g: R \to R$ where $f(x) = x^2$, $g(x) \neq x + 5$ Show that $f \circ g \neq g \circ f$.
 - (d) How many ways are these to select five players from 10 member tennis team to make a trip to match to another school.
 - (e) What is inhomogeneous recurrence relation?
 - (f) List out the properties where graph posses to qualify as tree?
 - (g) Define a wheel graph. A wheel graph has n+1 vertices, then determine the edges. Give example to support your answer
- 2 (a) Prove that √2 is mational
 - (b) Show that $\sim p$ is a valid conclusion from premises.

$$p \rightarrow r, r \rightarrow s, t \cup \sim s, \sim t \cup u, \sim u.$$

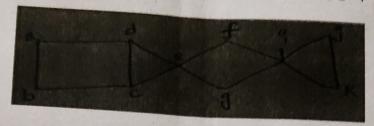

(a) Let $f: \mathbb{R} \to \mathbb{R}$, be defined by $f(x) = \begin{cases} 3x - 5; x > 0 \\ -3x + 1; x \le 0 \end{cases}$, then determine:

1.
$$f^{-1}$$
, $f\left(\frac{5}{3}\right)$ and $f\left(-\frac{5}{3}\right)$

2. f⁻¹(0), f⁻¹(-6), f⁻¹(1)

- (b) Prove that $(Q^+,*)$ where * is a binary operation defined by a*b=ab/5 is a group?
- 4 (a) Find the coefficient of x^{12} in $(1-4x)^{-5}$
 - (b) Solve the recurrence relation $a_n 7a_{n-1} + 10a_{n-2} = 0$ for $n \ge 2$ with initial conditions $a_0 = 10, a_1 = 41$
- 5 (a) Solve the recurrence relation $a_n 9a_{n-1} + 26a_{n-2} 24a_{n-3} = 0$ for, $n \ge 1$ 3, $a_0 = 0$, $a_1 = 1$, $a_2 = 10$ using generating function method.
 - (b) State and explain the properties of the pigeonhole principle.

6 (a) Draw and explain BFS and DFS algorithms for following graph.

(b) Show that any graph with 4 or fewer vertices is planar.

- 7 Write short notes on any two:
 - (a) Algebraic Structure
 - (b) Euler Circuits and Hamiltonian graphs
 - (c) Isomorphic Graphs
